MEMORANDUM FOR: Director of Training

SUBJECT : Weekly Activities Report
6 - 10 April 1970

GENERAL

1. On 8 April with several other OTR officers I attended a special briefing of employees going to "high risk of capture areas." In addition to employees now scheduled to travel to such areas, representatives of the four Deputy Directors, the IG, the General Counsel, and the Executive Director-Comptroller were there. These representatives will brief their leaders who in turn will discuss their interest in the program at a future Deputy Directors' meeting. My guess is that all will support the program and that OTR may be asked to play a greater role. The program is supported by an Ad Hoc Committee [REDACTED] in which I participate as the OTR representative. The pertinent regulation is [REDACTED]

3. On 9 April [REDACTED] of ALT, joined me to work as a panel in a session on "Agency Field Activities" for the Introduction to Intelligence Course.

notes

4. We have put together an Operations School Briefing Notebook.

STAFF TRAINING BRANCH

5. [REDACTED] has been conducting a tutorial session of the COS Seminar for a CS officer who, for security reasons, could not attend a regular session of the Seminar.

7. An RID student in CI Survey was "invited out" of the class because of chronic tardiness and absences. The RID Training Officer was informed and concurred, commenting that this employee has been a problem to RID.

25X1A 8. [REDACTED] visited [REDACTED] on 2 and 3 April in order to monitor the [REDACTED] Branch presentation to Operations Course Phase II.

9. With a change in the weather ST instructors and students suffered from a combination of spring fever and the vapours. However, they suffered more from the inadequate training facilities at 1000 Glebe Road. These classrooms were unbearably hot, stuffy, noisy and foul smelling.

AGENT AND LIAISON TRAINING BRANCH

10. Eight programs involving 38 trainees were conducted. Five programs were conducted in Washington, three were TDY's.

25X1A

11. On 8 and 9 April, [REDACTED] visited [REDACTED] for inspection purposes.

ITEMS OF QUESTIONABLE INTEREST

25X1A

12. Like all Operations School officers, Counterintelligence Instructor [REDACTED] will try almost anything to stimulate student interest and enhance the image of his courses. His latest scheme is to reward the best student with a free ride around the parking lot on his new motorcycle (first, of course, he has to learn how to start it). As a precautionary measure we have talked with CI Staff to see if they wish to comment on the security implications of this operation. As we anticipated, their initial reaction was positively negative, but they indicate they will reconsider their position if we provide adequate cover, register the vehicle in Arkansas, and equip the subjects with appropriate false documentation. Should CI Staff approve one experimental free ride, we will try to borrow enough slurry
